

Early Warning System - Case 19

Intellectual property products

Final methodological assessment - prepared by the EWS secretariat with the approval of relevant EWS network members

Based on information available in September 2019

Published March 2020

The national accounts of an EU Member State showed large imports and investments in intellectual property products in Quarter 2 of 2019. The case was discussed with the concerned Member State. The imports were from outside the EU. Since only one EU MS was involved, it was agreed not to launch an EWS case.
