

EUROPEAN COMMISSION EUROSTAT

Directorate C: Macro-economic statistics Unit C2: National accounts production

## Country specific metadata associated with national estimates for 2022Q3

The information below summarises metadata collected from countries in relation to the compilation and publication of European estimates of national accounts main aggregates for the 2022Q3.

The most recent metadata refer to data published in time for Eurostat's <u>7 December 2022</u> <u>news release on GDP</u>, <u>employment and main aggregates</u>. Estimates from countries were provided in the end November and were accompanied with the metadata explanations. Updated estimates are going to be provided in mid of January for T+110 database update. For further details see: QNA Porrelease calendar

Previously published: <u>2022Q3 metadata</u>, <u>2022Q2 metadata</u>, <u>2022Q1 metadata</u>, <u>2021Q4 metadata</u>, <u>2021Q3 metadata</u>, <u>2021Q2 metadata</u>, <u>2021Q1 metadata</u>, <u>2020Q4 metadata</u>, <u>2020Q3 metadata</u>, <u>2020Q2 metadata</u>, <u>2020Q1 metadata</u>.

Italy	<b>COVID-19 impact:</b> Some impact. Pretty complete unlockdown of all the economic
-	activities, but still voluntary measures to contain the evolution of the pandemic
	(mandatory in some cases) especially in public transports, public offices (smart
	working up to 50%) and in food service activities, entertainment and recreation.
	Estimation techniques: No relevant changes have been operated after that fine-tuning
	on seasonal adjustment models (augmenting the specification by dummy variables)
	was stopped from the release of end September.
	National information:
	News release: https://www.istat.it/en/archivio/276779
	National website: <u>Istat.it english</u>
Latvia	<b>COVID-19 impact:</b> No impact during 2022Q3, as there were no restrictions due to
	COVID-19.
	<b>Estimation techniques:</b> The estimation methods were not changed. Some
	imputations were made for the short-term indicators. The imputations for non-
	responding units were based on the information and development trends of the
	responding units.

Lithuania	<b>COVID-19 impact:</b> No impact during 2022Q3. There were no restrictions that could
Litilualila	negatively affect the economy. Nevertheless, the results of the last two quarters show
	an increase in bankruptcies linked to the suspension of the government's COVID-19
	support measures. The effect is likely to persist over the reference period as rising
	inflation contributes to deteriorating business conditions.
	Estimation techniques: GDP and EMP calculations did not differ. National information:
	News release: <u>News Release</u>
Austria	COVID-19 related explanations or metadata: <u>Corona STOP (Irv.It)</u>
Austria	<b>COVID-19 impact:</b> No impact, there were no significant government restrictions during
	the reference period.
	<b>Estimation techniques:</b> Some adjustments in techniques and sources (e.g. weekly
	adjustment in the profile of turnovers of affected industries).
	National information:
Deutscal	News release: <u>News release</u>
Portugal	<b>COVID-19 impact:</b> No impact. No specific COVID-19 restrictions measures with
	significant impact on economic activity, only some preventive measures. The year-on-
	year evolution of 2022Q3 compares with reference period 2021Q3, in which there was
	a gradual decrease of the restrictions to mobility imposed by the pandemic.
	Estimation techniques: In September 2022, external trade of goods and the short-
	term indicators were based on advanced preliminary data but complemented with
	administrative data.

Fatau!a	
Estonia	<b>COVID-19 impact:</b> No impact during 2022Q3, not many restrictions. Mostly
	mandatory masks in indoor public spaces and limits on the number of people
	allowed to events.
	Estimation techniques: No adjustment to the methodology was required. Source
	data had no accessibility issues. Quality of the estimates can vary if the COVID-19
	has affected the reporting of data by providers.
	National information:
	News release: <u>News Release</u>
Ireland	<b>COVID-19 impact:</b> No impact during 2022Q3. No restrictions since February 2022.
	The removal of remaining government restrictions permitted a significantly
	greater degree of economic & social activity in 2022Q1 and 2022Q2 than had been
	feasible in 2021 and this continued in 2022Q3.
	Estimation techniques:
	GDP: No changes of estimation methods, but some data sources were impacted
	which have made the provision of sub-aggregate of Personal Consumption
	Expenditure (PCE) more difficult. The unavailability of certain normally available
	data source breakdowns between goods and services, with the consequent need
	to examine and utilise supplementary alternative data sources such as Central
	Bank Credit and Debit Card data, has led to the goods and services sub-breakdown
	estimates being of somewhat lower reliability than usual.
