

ISA² Interoperability Quick Assessment Toolkit (IQAT[©])

European
Commission

IQAT[©]
Interoperability
Quick
Assessment
Toolkit

The Interoperability Quick Assessment Toolkit[©] is an Excel tool that allows Solution Owners to **assess the Potential Interoperability of their software solutions supporting Public Services.**

For further information, please visit:

<https://joinup.ec.europa.eu/asset/tescart/document/interoperability-quick-assessment-toolkit>

Features

Fully compliant with the 2017 version of the European Interoperability Framework (EIF) recommendations

Based on a specific **conceptual model** for the interoperability assessment of software solutions

Based on the automatically computed **Interoperability Assessment Score**, delivering a **4 stage maturity level** model

Expected Benefits

Supporting **portfolio management decisions:**

- ✓ by spotting areas for **improving the interoperability in a given solution**
- ✓ by suggesting solutions that could be published in the European Interoperability Cartography (EIC)
- ✓ by clustering solutions with regard to interoperability Maturity

Applicable to any software solution supporting public services (not only for TES)

Saving time and resources in IOP peer-to-peer tests by acting as a gateway to it

Supporting end users of the EIC in verifying the overall interoperability score of any published solution
