6.2: Financial Instruments – SMEG (by the end of Q1 2011).....	122

Introduction

The aim of this report is to provide an overview of beneficiaries of awarded grants and intermediaries of the financial instruments under the Entrepreneurship and Innovation Programme (EIP) in 2010. The data is compiled in a way that makes it possible to present the situation for each participating country in the EIP.

The structure of this report is divided into five “blocks” to reflect the areas under the EIP in which grants are awarded, followed by the financial instruments. The blocks are presented in the following order:

1. Enterprise Europe Network (aggregated level)
2. Enterprise Europe Network (detailed level)
3. Innovation measures
4. Eco-innovation measures
5. Other grants under the EIP
6. CIP Financial instruments

These five blocks represent approximately 90% of the EIP budget. With such coverage the overview offers a good picture of how these funds have been distributed. The remaining approximately 10% of the actions under the EIP mainly cover procurement.¹

Glossary

The present report provides data on the *grant beneficiaries* concerning the first four blocks mentioned above. For the fifth block, the CIP financial instruments, data is provided on *intermediaries* in participating country.

Grants

The template for **grants awarded** (other blocks than financial instruments) is similar to the format used for the *ex post* publication of awarded grants in accordance with the Financial Regulation². Some further information is provided, where possible, such as length of contract and whether the recipient is an SME. More precisely the template contains the following:

¹ As regards the objectives of the EIP listed in Article 10 of the CIP Decision, it can be noted that grants are mainly used to achieve objectives (b) the creation of an environment favourable to SME cooperation, particularly in the field of cross-border cooperation, (c) all forms of innovation in enterprises and (d) eco-innovation. Financial instruments are used for objectives (a) access to finance for the start-up and growth of SMEs and investment in innovation activities and (d) eco-innovation. Procurement is more common for objectives (e) entrepreneurship and innovation culture and (f) enterprise and innovation-related economic and administrative reform.

² Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities. For example, please see the following website: http://ec.europa.eu/enterprise/contracts-grants/calls-for-proposals/grants-awarded/index_en.htm

- information on the recipient of a grant, meaning the beneficiary who receives the grant.
- information on the country indicates the nationality of the recipient of the grant.
- Title of the action represents the name of the action financed.
- No of the action is the number used by the Commission in order to identify the action
- Maximum eligible cost of the project in € means the maximum costs of the action which are eligible including the contribution of the beneficiary (co-financing)
- Maximum EU co-financing in € represents the maximum Union financial contribution in terms of commitments (the maximum amount that the Commission may contribute).
- % EU represents the percentage of the Union financial contribution
- Duration of the grant agreement represents the period during which the action is implemented.

Financial Instruments

The table for the **financial instruments** gives a picture of the two main areas covered by the financial instruments: the High Growth and Innovative SME Facility (GIF) and the SME Guarantee Facility (SMEG).

As regards, the table concerning **the GIF**, the data has been collected in a cumulative manner (2010) using a specific template which contains columns for the following information:

- Financial instrument: This column splits the information between the two GIF windows - GIF1 (early stage) and GIF2 (expansion stage).
- Intermediary: means, for each window of the Facility, any intermediary defined as such in the relevant Investment Policy³ in which the EIF has made or intends to make an EU investment.
- Country of establishment is the country in which an Intermediary is legally established.
- Geographical focus means the geographical targets as set out in the fund investment strategy.

³ Investment Policy/ies means any or all of the Investment Policy and Implementation Guidelines for GIF1 and the Investment Policy and Implementation Guidelines for GIF2, as set out in the FMA signed between the European Commission and the European Investment Fund.

- Fund size current is the current size of a fund.
- Fund size target: Both GIF1 and GIF2 target Intermediaries with a sufficient target size to achieve a critical mass in the segment of the venture/risk capital market they address.
- EU share in intermediaries (%): Percentage of the EU's investments in the intermediaries' fund size.
- EU signed amount in €: Amount subscribed by the EU in respect of the intermediaries' fund size.
- Investment period (years): Period during which the intermediary may make initial investments in portfolio companies.

As regards the table concerning the *SMEG*, the data has been collected in a cumulative manner (2010) containing the following information:

- Financial Instrument: This column splits the data between the two SMEG windows (window 1: Loan guarantees; window 2: Micro-credit guarantees).
- Intermediary means for each window of the Facility, any intermediary defined as such in the relevant Guarantee Policy.
- Country is the country in which an Intermediary is legally established.
- Availability period is the period stipulated in the guarantee agreement between the EIF and each Intermediary, during which eligible Loans may be included in the Portfolio for cover.
- Cap amount represents the maximum amount to be paid from EU budget in million EUR.
- Maximum SME financing guaranteed represents the estimated total financing given to SMEs that has been supported by the EU guarantee at the end of the availability period, in million EUR.
